

## CURRICULUM VITAE - 2021

**Family Name:** Konstantinos J. Hazakis  
**Current Position:** Professor, Democritus University of Thrace  
Head of the department of economics, (1<sup>st</sup> December 2017 -     ), member of  
Democritus university senate (1<sup>st</sup> December 2017 -     )  
**Place of birth:** Thessaloniki, Greece  
**Postal Address:** University Campus, Komotini, Department of economics  
**Nationality:** Hellenic  
**E-mail:** kmhazaki@otenet.gr  
**Tel:** (0030) - 2531039821  
**Fax:** (0030) - 2531039830  
**Skype:** konstantinos.hazakis1

### **EDUCATION-STUDIES**

**1. Doctor of Philosophy (PhD.),** Distinction, Field: Political Economy, December 1999, Department of International and European Studies, Panteion University of Athens, Nov 1996 - Nov 1999, Thesis Title: *Attracting foreign direct investment in Transition economies.*

**2. M.Sc., Economics,** Department of Economics, London School of Economics and Political Science, Sept 1993-August 1994, Field: Political Economy, Thesis Title: *International Economic Policy Coordination in G-7 economic summits*

**3. B.Sc., Honours (9.27 /10)**, Sept 1989 - June 1993, Department of International and European Studies, Panteion University of Athens

4. French Collège De La Salle, Graduation June 1989

### **SCHOLARSHIPS/AWARDS/DISTINCTIONS**

**1. Rotary Club of Thessaloniki, October 1989.**

Awarded by Rector of Aristotle University of Thessaloniki Professor Trakatelis, for succeeding in University entry exams, (highest score among 160000 candidates in Greek exams (628/640)

**2. Greek Government Scholarship (IKY), 1989-1993.**

Academic excellence during all years of B.Sc. education

**3. London School of Economics and Political Science Scholarship, 1993-1994,** Scholarship for graduate studies.

**4. J. Pateras Fund Scholarship, Oct 1993 - Aug 1994**

Scholarship for Graduate studies in London School of Economics and Political Science.

**5. 34<sup>th</sup> Squadron of Greek Army, Oct 1996**

Honoured by the Cavalry Major for excellent accomplishment of duties as an officer during military service (November 1994 - October 1996).

### **Administrative experience**

Democritus University of Thrace, Head of the department of economics, (1<sup>st</sup> December 2017 - ).

### **RESEARCH INTERESTS**

1. European Political Economy - European economic governance
2. International Political Economy - International trade.
3. Foreign Direct Investment/Privatization.
4. International Economic Policy Cooperation with emphasis in G-8/G-20 Summits.
5. Multinational Corporations and economic development.
6. Methodology of economic and social science.

## **ACADEMIC POSITIONS/UNIVERSITY TEACHING EXPERIENCE**

### **Current Posts**

**January 2019 -** *Department of Economics, Democritus University of Thrace, Greece, **Professor***

1. Undergraduate courses: International Political Economy, International Business relations.
2. Postgraduate courses: Multinational Corporations, Political economy of European integration, Leadership and management, Methodology of economic and social sciences.
3. Supervision and examination of graduate theses and PhD dissertations in the fields of international economics, regional economics, European economics, political economy and business economics.

**April 2014 – December 2018** *Department of Economics, Democritus University of Thrace, Greece, **Associate Professor***

1. Undergraduate courses: International Political Economy, International Business relations.
2. Postgraduate courses: Multinational Corporations, Political economy of European integration
3. Supervision and examination of graduate theses and PhD dissertations in the fields of international economics, regional economics, European economics, political economy and business economics.

**April 2008- April 2014** *Department of Economics, Democritus University of Thrace, Greece, **Assistant Professor***

1. Undergraduate courses: Economics of South – east Europe, Transition economics, macroeconomics, International political economy, Regional economics, Economic relations and institutions in South-East Europe, International business relations, European union and developing countries
2. Postgraduate courses: International Trade, Multinational Corporations, Economics of NGOs.
3. Supervision and examination of graduate theses and PhD dissertations in the fields of international economics, regional economics, European economics, political economy and business economics.

4. Departmental Coordinator, Erasmus Mobility and Erasmus Placement Program (2008-2015).
5. Member of Undergraduate program committee.
6. Research in the field of international and European political economy.
7. Responsible for the report on internal assessment of the Department of economics (2009-2016).
8. Departmental academic mentor.

**June 2009 - 2018** *Institute of International Economic Relations of Athens*

1. Research Fellow and member of the editorial board of the Journal “Agora without frontiers”.

#### **Previous Posts**

**Oct 1999 - February 2004,**

**Oct 2009 - January 2009** *Department of International and European Studies, Panteion University of Athens, Visiting Professor Post-Graduate studies Program*

1. Program of post-graduate studies: Multinational corporations, Protection and promotion of foreign direct investment.

**Oct 2006-February 2008** *Department of International and European economic and political Studies, University of Macedonia, Visiting Professor*

1. Undergraduate programme: Political Economy, International economic development, Regional economic unions.

**March 2003-August 2003** *Department of Economics, University of Thessaly, Visiting Professor*

1. Undergraduate programme: Multinational corporations

**Oct 2005-August 2006** *Department of Mediterranean Studies, University of Aegean, Visiting Professor*

1. Undergraduate programme: International economic relations I, International Relations II, Political economy of International relations, Selected issues in International economic relations.

**March 2006-August 2006** *Department of Balkan studies, University of West Macedonia Visiting Professor*

1. Undergraduate programme: International business.

**Oct 2002-February 2008** *Department of economics, Democritus University of Thrace, Visiting Professor*

1. Undergraduate programme: Balkan economies, Economic geography in South-east Europe, Regional economics, International business, Economics of transition, Microeconomics

2. Postgraduate program: World trade, Multinational corporations (March 2007- )

(J22) Konstantinos J. Hazakis, 2021, Is there a way out of the crisis? Macroeconomic challenges for Greece after the Covid-19 pandemic, *European society and politics*, online access.

In the last decade, Hellenic economic adjustment managed to restore macroeconomic balances and positive growth rates although to the detriment of debt sustainability and citizens' welfare. Covid-19 hit in 2020 the growth drivers of the Greek economy leading, once again, to rise of unemployment and to depression of economic activity. The article presents the macroeconomic priorities for the Greek economy after Covid-19 pandemic. The analysis considers four issue areas that are closely linked with growth namely primary fiscal balance, debt sustainability, external competitiveness and unemployment-poverty. It is argued that under certain conditions positive evolution of the four variables can keep Greek economy and Greek productive networks on track, limiting negative repercussions for the Greek society.

(J23) Konstantinos J. Hazakis, 2021, The rationale of the comprehensive economic and trade agreement (CETA): An institutional Approach, The Hellenic open business administration journal, volume 7, no1, 37-62.

Aggressive trade unilateralism, Doha trade round failure and the emergence of regional trade blocs, complicate international trade politics. Within such a volatile environment, the comprehensive economic and trade agreement (CETA) enforces EU-Canada trade relationships. The article examines CETA from an institutional perspective, acknowledging the specificity and the logic of the agreement. It is evident that CETA rationale includes not only the liberalization of inter-regional trade but also the accommodation of the regulatory –institutional challenges of EU- Canada trade.

It is argued that efficient regional trade regimes as CETA, contribute substantially to trade cooperation, to transactional efficiency, to collective trade norms and values and to convergence of heterogeneous trade interests and preferences, forwarding a cooperative equilibrium.

(J 24) Ioannis Dokas, C. Leontidis, N. Eriotis, Konstantinos Hazakis, 2021, Earnings management: an overview of the relative literature, Bulletin of applied economics, pages 25-55, volume 8 (2).

This article aims to present a critical overview of the traditional studies in earnings management, focusing on the impact on the making decision process. This overview in the literature provides numerous aspects of this topic, in line with the firms' motivations. Earnings management procedure includes smoothing and opportunistic

practices and illustrating accounting rules with a significant effect on accounting information quality. Several researchers have shifted their attention to real activities as a primary method or supplementary to accrual-based methods to obtain a complete view of the earnings management levels. Earnings management is considered an opportunistic instrument, and it can be part of the aggregate long-term business strategy. This review study provides some guidelines, to academics and professionals, in line with the models and the motivations that lead managers to engage in this procedure. This overview creates new research avenues enhancing the existing knowledge.

(WP2) K. Hazakis- P. Proedrou, (2012), Optimizing EU-Russia energy Diplomacy: The need for an active strategic partnership, College of Europe, Bruges, EU Diplomacy Papers 04/2012

(WP3) Konstantinos Hazakis, 2019, A new analytical framework to explain the troubling EU (dis)integration dynamics, Institute on Comparative Regional Integration Studies, United Nations University, UNU-CRIS Working Paper, w-2019-10, December

Disintegration literature is deprived of a widely accepted policy framework to analyze the rationale, the traits and the impact of European integration/disintegration. This article presents a policy oriented analytical framework so as to perceive the complex interplay of EU integration-disintegration dynamics. The analysis begins by setting the problem while section two describes the major tenets of existing EU integration theories on disintegration challenges. Section three analyses the content of an alternative analytical framework for understanding EU integration-disintegration dynamics while chapter four concludes and reaches useful policy implications

(WP4) Konstantinos J. Hazakis, 2021, The impact of disintegration dynamics on EU international trade policy: An institutional analysis, The center for global political

economy, working papers series number 20, University of Sussex, 11 December 2021, pages 41.

Safeguarding access to international markets requires an effective EU international trade policy. Equally important, preserving an open, rules-based world trading system presupposes strong EU capability as well as consensus of EU states on the scope and targets of EU international trade policy. The paper presents a policy oriented analytical framework of EU international trade policy taking into consideration the impact of disintegration dynamics and emerging trade protectionism.

Initially, the analysis sets the problem while section two offers the major tenets of the politicization of EU international trade policy. Section three presents the key arguments of the institutional analysis on the issue while section four analyses the content of an alternative policy framework for understanding disintegration - EU trade policy interaction. Section five concludes and reaches useful policy implications. It is suggested that there is a need for more Europe on international trade meaning enhanced, effective and inclusive EU trade institutional action.

Long term economic adjustment without growth delivers economic stagnation. Analyzing the Hellenic adjustment effort, it becomes evident that fiscal consolidation attains primary surpluses while it leaves public debt at non-sustainable levels. The terms of the economic consolidation program in Greece do not favor structural and real convergence to euro area average but mainly target nominal convergence with Eurozone economies. Excessive direct and indirect taxation, internal devaluation of incomes, institutional inertia on critical growth issues, and public expenditure contraction undermine real economic adjustment.

(Ch19) Konstantinos J. Hazakis, The expansionary fiscal consolidation theorem in doubt: Its tragic implications and why it should be avoided, in Spyros Roukanas et al., (2018), The political economy of development in south eastern Europe, Springer, pages, 3-16

(Ch21) Konstantinos J. Hazakis, forthcoming, 2021, An Odyssey with a happy end? Growth challenges, successes and failures of Greece during covid-19 era, In book titled “Modeling economic growth in contemporary Greece: The role of changing economic and industrial contexts”, edited by Vasileios Vlachos, Aristidis Bitzenis and Bruno Sergi, Emerald publications, Emerald “Entrepreneurship and Global Economic Growth” series <https://books.emeraldinsight.com/page/series-detail/Entrepreneurship-and-Global-Economic-Growth/>

Greek economic adjustment and memoranda austerity lasted for ten years followed by intense academic and political debate over their impact on Greek society. Macroeconomic stabilization succeeded in nominal terms but to the detriment of growth drivers and social welfare involving asymmetrical and high social cost.

The article presents the key growth challenges after March 2020, taking into account the covid-19 disastrous impact. From an institutional point of view, transaction cost reduction, attainment of market credibility, trust and confidence, and improvement of economic and social cohesion, remain doubtful in the long term if macroeconomic stabilization not collides with export-oriented growth and structural reforms.

(C26) Konstantinos Hazakis, 2017, Expansionary fiscal austerity in euroarea: Is there a way out? International conference on international business, University of Macedonia, 20th may, fourth session, published December 2018, ICIB proceedings, A .Bitzenis et al. University of Macedonia, pages 63-70.

The debate over the positive spillovers of fiscal consolidation begins in the 1960s and takes into consideration the crowding out results of fiscal policies on private investments based on the analysis of IS/LM model. The IS equation concerns the equilibrium between output and interest rates in an economy based on the linkages between investment and savings. Accordingly, the lower the interest rate the larger the amount of output. The LM curve concerns the linkages between output and interest rates based on money demand and supply (higher interest rates lead to smaller holdings of money). Fiscal policy concerns the IS curve and monetary policy the LM curve. Their intersection is vital and sets the level of aggregate demand at any given price level.

The EFC theorists took into account the Ricardian equivalence hypothesis that is the belief that debt-financed fiscal policies are not effective and agents anticipate future taxation increases ending in reduction of consumption and investment. In the 1990s and especially from 2000 with the introduction of euro expansionary fiscal austerity theorem gathered momentum suggesting that under specific terms, expansionary fiscal policy may have stabilizing results on fiscal balances, stimulating private consumption and investment, boosting economic activity (expansion rather than contraction as argued by the standard Keynesian arguments) and improving exports. The EFC choices are leading economies to a policy impasse. Fiscal consolidation brings only short term fiscal primary surpluses while public debt ratios keep growing. Confidence, which is expected to make the private sector restart investment, is not taking place. Governments have little policy space on the fiscal side and no possibility

to follow through European central bank an alternative policy in the monetary field. Quantitative easing prevented a liquidity crisis but cannot deliver automatically growth results. Fragile banks that have not been able to absorb their bad loans to the private sector face severe liquidity problems.

The article raises several doubts about the efficacy of EFC programs. Time lag between intermediate troika assessment, the delivering of adjustment programs tranches and the dynamics-priorities of national macroeconomic frameworks lead often to a non-orderly application of policies. Further, the idea that fiscal austerity enforces sustainable components of growth finds little support in the data. Fiscal retrenchment typically has contractionary effects on economic activity and leads to higher unemployment rates and high levels of national debt. Perotti himself (2012) argued after reexamining the fiscal episodes in Denmark (1982-1986), in Ireland (1987-1990), in Finland (1992-1998) and in Sweden (1993-1998), that “the results cast doubt on some versions of the expansionary fiscal consolidations hypothesis and on its applicability to many countries in the current circumstances”. Low growth impacts on the debt-to-GDP ratio by weakening GDP (the denominator).

Thus, the article rejects EFC theorem and suggests that an adjustment is effective if it provides a viable and final solution to the original problem that raised its necessity. Thus , effectiveness refers to a triple challenge namely to identify the core pillars of macro, micro-economic and structural imbalances in a country, to induce corrective action with long term positive results and to balance economic effectiveness with social equity at the domestic level. Effectiveness is linked to specific structural/fiscal problems and the ability to solve them taking into account the necessity of European social and economic cohesion. Obviously, it involves a completely different identification of problems, hierarchy of issue areas priorities and corrective actions to face them.

EFC programs proved ineffective because of four failures: failures of policy mix (simultaneous expenditure reduction and tax increases as well as fiscal and investment multipliers errors), failures of knowledge (concerning national economic path dependency conditions as well as national economic priorities for development); failures of implementation (concerning state ability and resources) and failure of strong political will (due to inexistent reform-oriented electorate and strong vested interests with rent-seeking behavior).Moreover, one should mention that EFC

undermined the impact of the private credit-led speculative boom and did not face properly the impact on banks and households.

In conclusion, fiscal austerity and wage compression have become part of the problem, not of the solution. This does not mean that fiscal discipline is not important but that it must be exercised within a policy programme for restarting growth, and it should take into account the idiosyncrasies of the state. Moreover, targeted financial enforcement of selected export oriented sectors in euro area countries does not mean a spending spree but achievement of Balassa/Samuelson effect in the tradables sector.

Conclusively, it becomes evident that adjustment should equally target from the beginning structural and fiscal consolidation, enforcement of local productive networks (and their ability to competitively export), taking into consideration the necessity to protect the most vulnerable social groups and maintain programmes with positive spillover effects in economy. It looks like that euroarea states should apply new normative and cognitive rules for adjustment giving an end to a vicious circle of depression.

### **SCIENTIFIC ACTIVITIES**

#### **B1.Research**

(B1A) Research fellow-Greek Centre of Political Research, Panteion University of Athens, January 2004-April 2008).

(B1B) Post doctoral research, Institute of international economic relations of Athens, May 2004-May 2007, Subject: International economic policy coordination.

(B1C) Research fellow (May 2004- ) and member of the editorial board of the Journal “Agora without frontiers” (June 2009- ), Institute of International Economic Relations of Athens

(B1D) Participation in the project of the Greek general secretary for youth, (Ministry of education), for the new guide for young entrepreneurs concerning the start-up of new firms, (six units of the guide), March 2008-October 2008.

(B1E) Participation in the project, The economic and social impact of Burgas-Alexandroupolis oil pipeline, 2010.

(B1F) Supervisor of post graduate theses and Ph.D. Theses in Democritus University of Thrace.

(B1G) Author of the Departmental internal assessment reports in Democritus University of Thrace.

(B1F) Head of the internal assessment unit of department of economics of Democritus university of Thrace (2017 - ).

## **B2.Member of scientific Associations**

(B2A) Member of Cedimes

(B2B) Member of the European Association for Evolutionary Political Economy

(B2C) Member of the Hellenic Society of International Relations and International Law

(B2D) Vice President of the Union of Young scientists for European Studies (June 2000-November 2004)

(B2E) Member of the Greek section of European Regional Science Association (ERSA-GR)

(B2F) Member of the World Economics Association

(B2G) Member of the Regional science association international (RSAI)

(B2H) Member of the International network for economic research

## **B3.Referee-Member of Editorial Boards**

(B3A) Agora without frontiers, published by the Institute of International Economic relations, Athens, (February 2007- )

(B3B) Bulletin of the Greek Academy for Business Administration (January 2006-2013).

(B3C) Member of the Editorial Board of Regional Science Inquiry, (2010-2012)

(B3D) Referee Contemporary Social Science.

(B3E) Referee East-West Journal of economics and business.

(B3F) Referee International Journal of economic policy in emerging economies.

(B3G) Referee International Journal of Sustainable development.

(B3H) Referee Analects of economic and political sciences.

(B3I) Referee International Journal of Global Trade and Markets.

(B3J) Referee Middle East Forum.

(B3K) Referee East West Journal of Economics and Business

(B3L) Referee International Journal of Diplomacy and economy

(B3M) Referee, Journal Aeixoros

(B3N) Referee, Politics and Policy

(B3O) Referee, EBEEES, 2015 and 2017

(B3P) Referee, ICIB, 2015 - 2019

#### **B4. Conference Chairman-Coordinator of Sessions**

(B4A) First Pan-Hellenic Conference on International Political Economy, Chairman of the session: Financial aspects of globalization, September 19<sup>th</sup>, 2003.

(B4B) First global international studies conference, Chairman of the session: The problems of corruption, August 25<sup>th</sup>, 2005.

(B4C) Second Pan-Hellenic Conference on International Political Economy, Chairman of the session: European countries in transition, September 17<sup>th</sup>, 2005.

(B4D) Third Pan-Hellenic Conference on International Political Economy, Chairman of the session: European Union and the global economy, May 16<sup>th</sup>, 2008.

(B4E) International Conference on Applied business and economics, Chairman of the morning session, October 4<sup>th</sup>, 2008.

(B4F) International Conference on International Business, Chairman of session, 23 May 2010, University of Macedonia, Greece.

(B4G) Member of the Organization Committee of the International Conference on International Business, University of Macedonia 22-23 May 2010.

(B4H) Member of the scientific committee of the Fifth annual south-east European doctoral student conference 2010, SEERC, (Southeast European research centre, Thessaloniki, July)

(B4I) Member of the Organization Committee of the International Conference on International Business, University of Macedonia 19-21 May 2011.

(B4J) Member of the Organization Committee of the International Conference on International Business, University of Macedonia 19-21 May 2012.

(B4K) Member of the Organization Committee of the International Conference on International Business, University of Macedonia, May 2013.

(B4M) Chairman of the third session, International Conference on International Business, University of Macedonia, (titled, Current issues in economic growth: From the causes of the fiscal crisis to macro-micro alternatives of growth, 16-18 may 2013).

(B4M) Member of the Organization Committee of the International Conference on International Business, University of Macedonia, May 2014.

(B4N) Member of the Organization Committee of the Research Conference on economics organised in department of economics of Democritus University of Thrace (April 2014)

(B4O) Chairman of the first parallel session, Conference on “Greek Economy: From crisis to development”, University of Thessaly, Volos, 4-5 April, 2014.

(B4P) Chairman, third session, International Conference of Sciences, American University of Rome, 28-10-2014

(B4Q) Member of the Organization Committee of international conference “Economies of Balkan and eastern Europe countries”, University of Macedonia and Technological institute of Kavala, Kavala, 8-10 May 2015.

(B4R) Chairman, first session, (08-05-2015), International conference, “Economies of Balkan and eastern Europe countries”, Kavala

(B4S) Member of the Organization Committee of the International Conference on International Business, University of Macedonia, 22-24 May 2015.

(B4T) Chairman, second session, International Conference on International Business, University of Macedonia, “Banking, finance, risk management and foreign direct investment”, 23 May 2015

(B4U) Chairman, first session, International Conference on International Business, University of Macedonia, “Current developments and economic conditions in southeast Europe”, 22-05-2015

(B4V) Chairman, several sessions, International Conference on International Business, University of Macedonia, 2016, 2017, 2018, 2019.
